

November 30, 2020

Dear Family Members and Friends,

We have become aware that an employee, who last worked in the community over a week ago on Saturday, November 21st, recently tested positive for COVID-19.

The staff member who tested positive had passed the pre-shift medical screening prior to their last shift and was showing no symptoms the last time they worked in the community.

Our top priority is the well-being of the residents we serve, and we realize this news will cause concern.

Universal testing of all staff as well as all residents will take place tomorrow, December 1<sup>st</sup> and we will communicate information related to the results as soon as they are available.

We appreciate your support as we work diligently to keep the residents we serve safe and to make each day the best day possible.
